

Hanen Ahmed Alahmari

✉ Hanen29111@outlook.sa ☎ 0554596099 📍 Jeddah, Saudi Arabia

Training objective

I am an Information Technology student seeking a summer internship in cybersecurity, specifically in a Security Operations Center (SOC). I have a basic understanding of networking and aim to gain hands-on experience in log analysis, threat detection, and incident response while developing my technical skills.

Education

King Abdulaziz university 2023 – 2027
4.67 / Bachelor of Information Technology

Projects

ARP Poisoning & MITM Attack Analysis 04/2026

- Conducted ARP poisoning attack using Kali Linux and Metasploitable 2 to simulate a Man-in-the-Middle (MITM) scenario
- Captured and analyzed network traffic using Wireshark to identify intercepted packets (TCP, ARP)
- Investigated ARP table manipulation and demonstrated traffic redirection
- Restored network state by stopping the attack, clearing ARP cache, and verifying correct IP-MAC mappings
- Applied defense mechanisms such as Dynamic ARP Inspection (DAI) and static ARP entries

Network Reconnaissance using Nmap 02/2026

- Performed network scanning and service enumeration using Nmap on a vulnerable system
- Identified open ports, running services, and software versions
- Conducted OS fingerprinting and vulnerability analysis
- Used Nmap scripting engine (NSE) to detect misconfigurations and security weaknesses

Technical Skills

- | | |
|------------------------|-----------------------|
| • Splunk | • Log analysis |
| • Threat analysis | • Security Monitoring |
| • Incident Response | • Linux |
| • Network Fundamentals | • Python |

Soft skills

- | | |
|-----------------------|-------------------|
| • Analytical Thinking | • Problem Solving |
| • Attention to Detail | • Teamwork |
| • Fast learning | |
